7 Times You Should Break Grammar Rules

Usually, it’s important to adhere to grammatical rules in your writing. Grammar organizes and directs our writing. It makes words and sentences meanings clearer and guides readers through text.

In academic and professional writing, correct grammar should be a priority. But in other kinds of writing, sometimes it’s actually better to break—or bend—grammar rules.

Here’s why: No matter what you’re writing, clarity should always be a priority. Sometimes, this means it’s best to disregard an established grammar rule, like by splitting an infinitive or ending a sentence with a preposition, to ensure that your reader easily understands your message. In other cases, like with dialogue, free verse poetry, and direct response copy, sticking to grammar rules can make it harder for readers to connect with your work. Characters who speak like real people feel more vivid to readers, punchy copy grabs readers’ attention in ways more formal language can’t, and free verse poetry typically uses language in creative and innovative ways.
