food waste: food that is discarded or uneaten

Restaurants are finding creative ways to repurpose **food waste**.

all-inclusive resort: a hotel where accommodation, meals, drinks, and activities are included in one price

Many families prefer **all-inclusive resorts** for their convenience.

environmentally-conscious: being aware of and actively trying to reduce harm to the environment

Businesses are adopting more **environmentally-conscious** practices.

single-use: items designed to be used once and then discarded

Many countries are banning **single-use** items to reduce waste.

eco-tourism: travel focused on visiting natural areas in a sustainable and responsible way

Eco-tourism promotes conservation and supports local communities.

rooftop garden: a garden located on the roof of a building

The hotel's **rooftop garden** provides fresh herbs for the restaurant.

insulation: material used to reduce heat transfer and maintain indoor temperatures

Good **insulation** keeps homes warm in winter and cool in summer.

solar panels: devices that convert sunlight into electricity

Installing **solar panels** helped the hotel reduce its energy bills.

to source (something): to obtain materials or products from a specific supplier or location

The restaurant **sources** its ingredients from local farmers.

toiletries: personal care items like soap, shampoo, and toothpaste

Single-use **toiletries** are being replaced with refillable options in many hotels.

rainwater harvesting: the collection and storage of rainwater for reuse

The farm uses **rainwater harvesting** to irrigate crops.

glamping: luxury camping that combines outdoor experiences with modern comforts

Glamping offers the adventure of camping with the comfort of a hotel.
